

Restoration Ecology Research Group

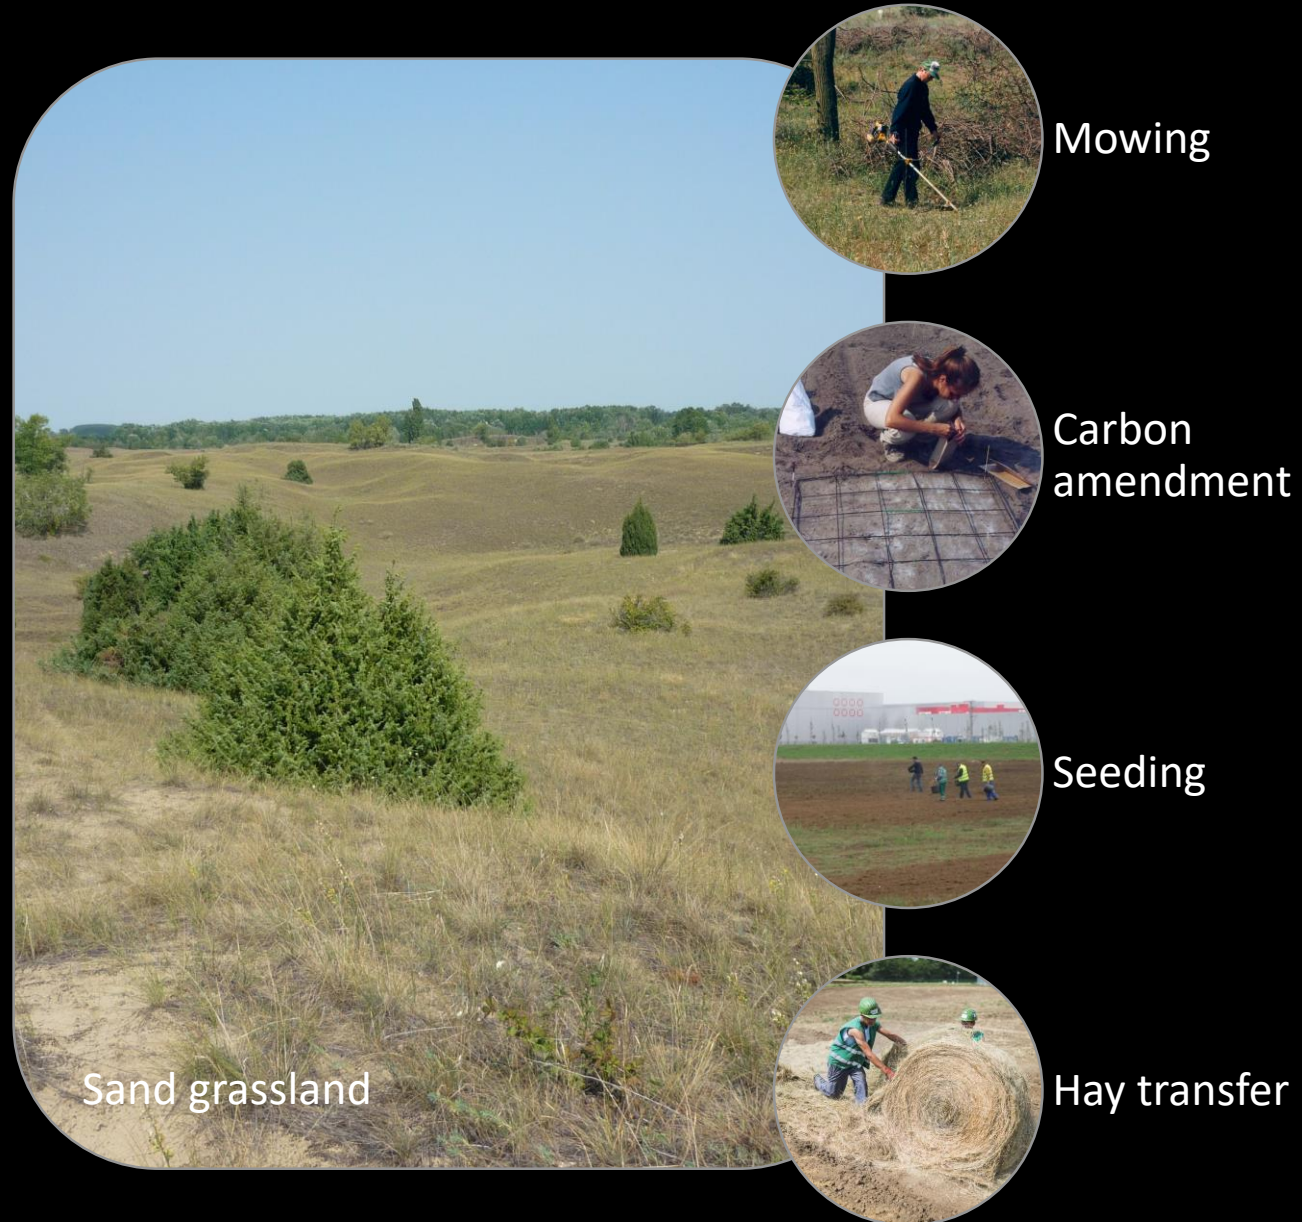

<https://ecolres.hu/node/4762>

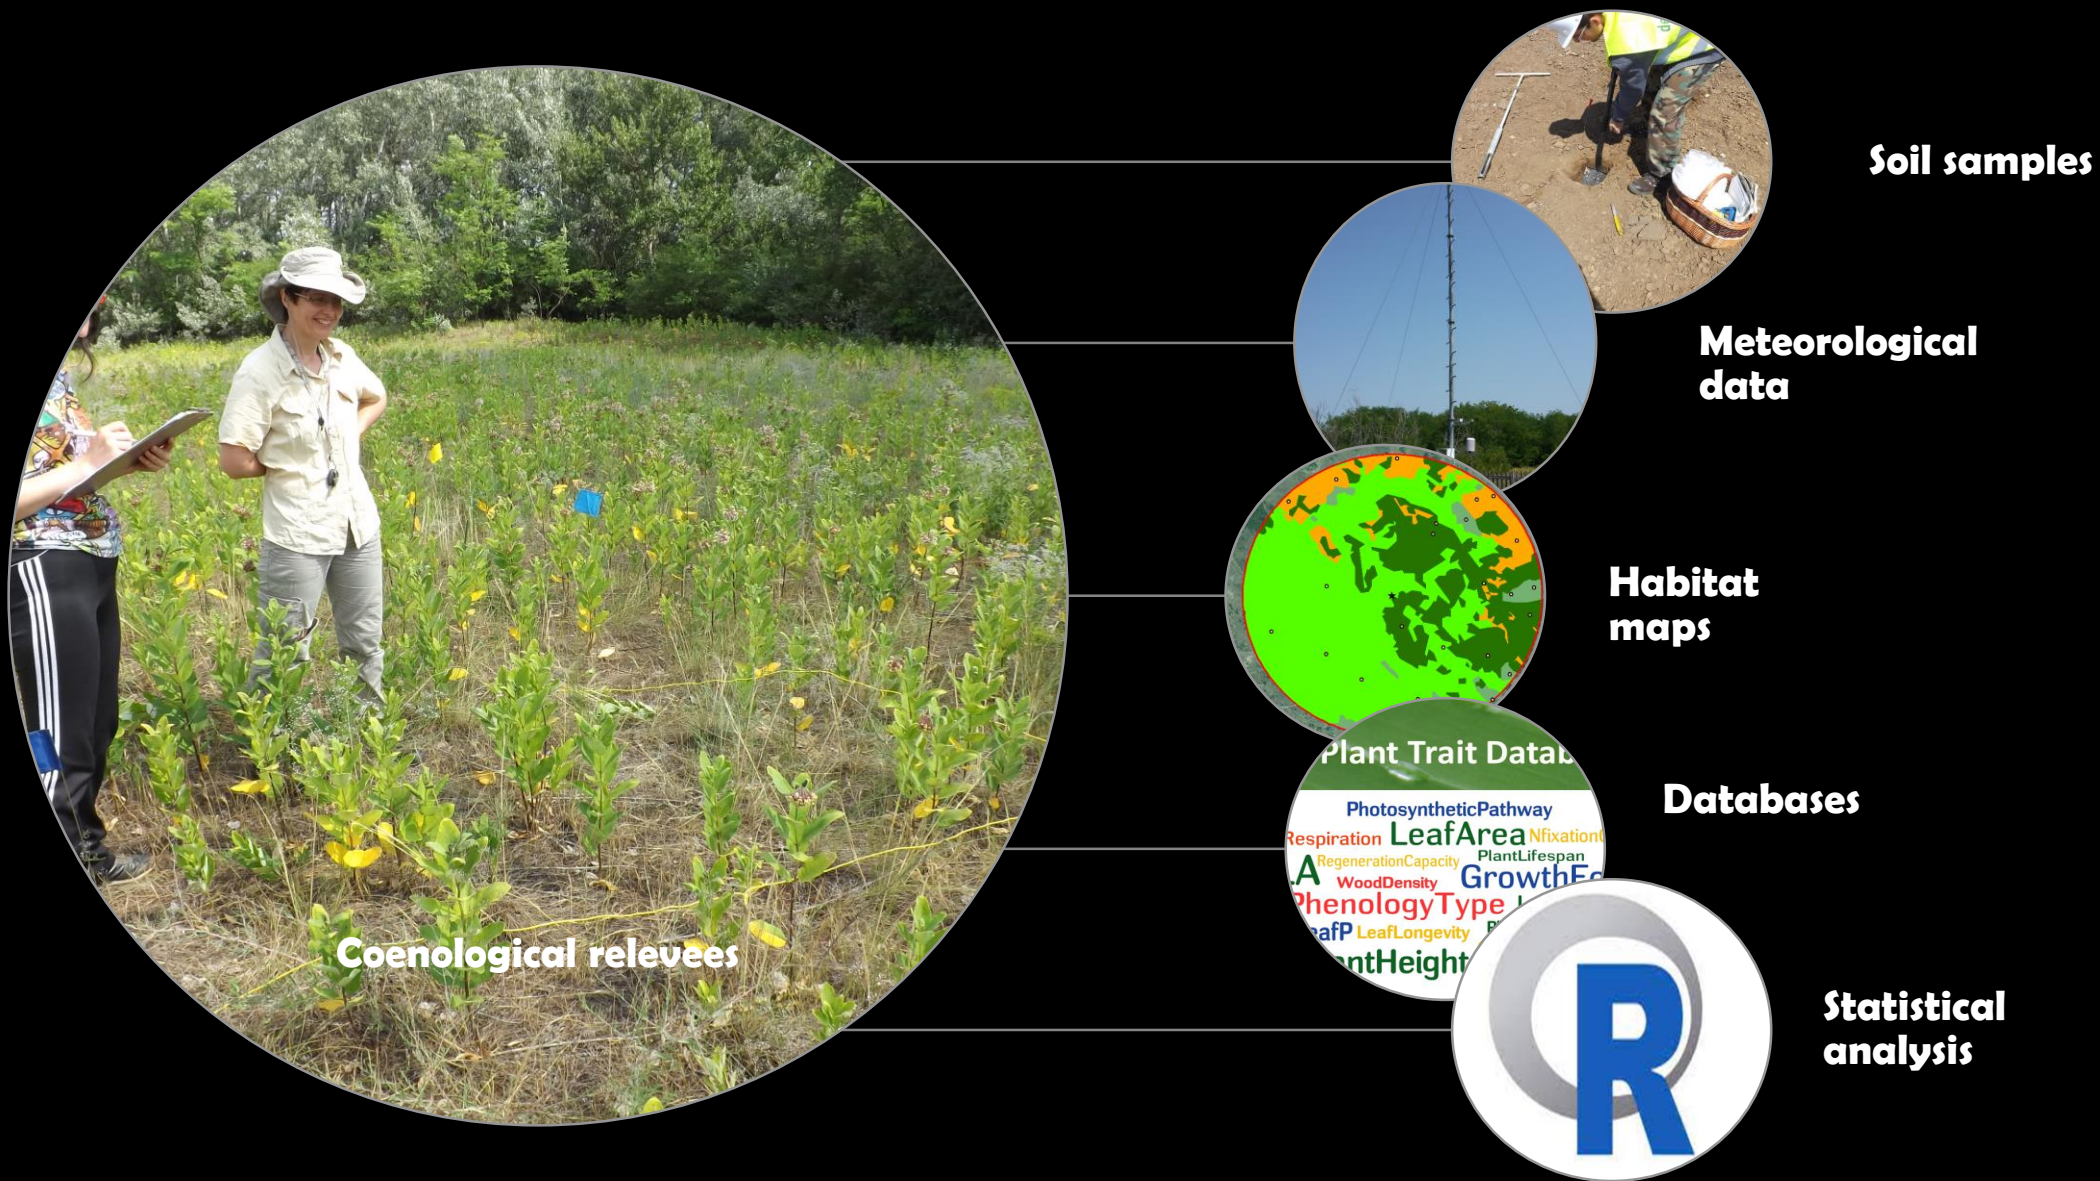

**We study how to restore native, semi-natural grasslands in degraded habitats
by assisting natural regeneration processes**

Main restoration interventions

Monitoring & Data analysis

Possible topics

**Long-term effects
of restoration
interventions as a
function of
weather**

**Long-term effects
of seed storage on
reintroduction
success**

**Trait-based
analysis of
restoration
success**

**Soil seedbanks in
relation to
different seed
introduction
methods**

Halassy, Melinda
senior research fellow
